General Criteria

Nominees must be either U.S. citizens or U.S. organizations.

Public Benefit Flying is defined as those activities, conducted largely by volunteers, in which one or more general aviation aircraft were used to support the health and well being of anyone needing charitable assistance or for the benefit of the general public, and for which no fee was charged for the aircraft or for pilot services.

Awards are intended to honor the efforts of volunteers working in the field of public benefit flying, or those who support them. Awards may be granted to individuals, teams, groups, or organizations, as appropriate.

Awards may be based on just one or on several extraordinary events or accomplishments or may be based on long term or lifetime achievement. This must be clearly expressed in the nominating materials.
